

Enclosure and Panel Shop Services

Object Technologies CEM, Inc. specializes in the design of custom enclosures for its PLC and computer enclosures. Object Technologies enclosures can include features such as a removable rear wall and the same patented mounting as Rittal's PS Series and Hoffman enclosures. All of our enclosures use old-rolled steel housing incorporating a self supporting perimeter which provide outstanding load capacity and rigidity. Most of our enclosures feature reversible (left/right) doors and accept the full range of accessories.

Enclosures

Enclosures are available in standard sheet steel or stainless steel in the following versions:

- Junction boxes
- Instrument
- Compact
- Field Bus
- Non-Metallic
- Modular Freestanding
- Freestanding
- Computer Enclosure
- Computer Interface
- Console System
- Operator Interface

Panel Shop

Our shop is designed to deliver the highest quality enclosures available, from custom layout and assembly to shipping your cabinet.
